OBJECTIVE

Motivated Computer Science student and aspiring Machine Learning Developer seeking an opportunity to apply data science and problem-solving skills in a dynamic environment. Eager to contribute to real-world projects while continuously enhancing technical expertise in Python, Machine Learning, and Data Analysis.

WORK/PROJECT EXPERIENCE

Voxify – Media Conversion Web Application (Hackathon Project)

Sep 2025- Oct 2025

- Developed Voxify, a full-stack media conversion application using React and Flask, enabling seamless conversion between video, audio, text, and speech formats.
- Implemented features including video-to-text transcription, audio-to-text conversion, text-to-speech generation, OCR-based image-to-speech, and video trimming functionality.
- Built a responsive frontend using React and integrated backend services with Flask for efficient media processing and API handling.
- Delivered a unified platform allowing users to perform multiple media operations in one place, improving usability and workflow efficiency.

Student Performance Analysis | [Deployed App](#) | [Github](#)

April - May 2026

- Analyzed student performance dataset to identify key factors affecting academics outcomes using Python, Pandas, and Matplotlib.
- Built and evaluated classification models using Scikit-learn, applying Ridge Regression to predict student performance scores in the range of 0-100 with optimized accuracy.
- Performed exploratory data analysis (EDA) and feature engineering to clean and prepare data for modeling.
- Evaluated model performance using R^2 score and RMSE; deployed project on AWS with source code on GitHub.

Algerian Forest Fire Prediction | [Deployed App](#) | [Github](#)

May 2026

- Built a regression model to predict the Fire Weather Index (FWI) using real-world environmental data including temperature, humidity, wind speed, and rainfall.
 - Applied data preprocessing, outlier handling, and feature selection to improve model performance.
 - Trained Ridge Regression model using Scikit-learn and evaluated using RMSE and R^2 score.
 - Deployed the project on AWS with full documentation on GitHub.
-

EDUCATION

Bachelor of Computer Application

Aug 2023 - Jul 2026

- Maa Shakumbhari University
 - CGPA : 7.33
 - Expected Graduation : 2026
-

ADDITIONAL INFORMATION

Technical Skills:

- **Language:** Python
 - **Database:** MySQL
 - **Libraries:** Numpy, Pandas, Matplotlib, Scikit-learn
 - **Tools:** Git, Github, VS Code, Jupyter Lab
 - **Concepts:** Machine Learning, EDA, Data Visualization, Automation, File Handling, Advanced ML (In Progress)
 - **Currently Learning:** Advanced Machine Learning
-

CERTIFICATIONS/COURSES

- **Python Programming – CodeWithHarry:**
Applied concepts to build projects such as a chatbot and file automation tool, strengthening problem-solving skills.
 - **Data Science & Machine Learning – CodeWithHarry:**
Worked with NumPy and data processing techniques to understand real-world data handling.
 - **MySQL & Advanced Data Science – Udemy:**
Enhancing skills in database design, SQL queries, and advanced data analysis techniques.
 - **Advanced Machine Learning – Udemy(Ongoing):** Currently learning advanced ML concepts including model deployment, pipelines, and real-world project implementation.
-
